- ✔ Sun-damaged skin
- ✔ Fine lines & wrinkles
- ✔ Post-traumatic & acne scars
- ✔ Age spots

Visible, long-lasting results	Quick, in-office procedure	
	Customized	Soft, smooth skin

CO₂RE – Proven Solution For Smooth Skin

What is CO₂RE?

CO₂RE is a fractional therapy CO₂ laser for skin rejuvenation. Your skin is treated with a matrix of laser points that vary in intensity, depending on your skin type and desired treatment results. The result is a treatment that is fast, comfortable and requires limited downtime - enabling you to achieve optimal results.

CO₂RE has been proven effective in enhancing skin tone and texture, eliminating the effects of the sun and aging on the skin, smoothing out lines, wrinkles, and scars. Treatments can vary based on the extent of skin rejuvenation you're looking for.

How do I know if CO₂RE treatments are right for me?

Ideal candidates for CO₂RE have skin damaged by exposure to the sun, age spots, fine lines, wrinkles, discoloration, rough texture (acne scars). It is ideal for anyone seeking younger looking skin with treatments that have limited downtime.

What is the CO₂RE procedure like?

You can expect some moderate discomfort during the treatment, but the anesthetic applied prior to the procedure typically makes any discomfort tolerable.

Is CO₂RE safe?

You should speak with your practitioner about your complete medical and skin history to minimize the potential for any negative reactions.

How many CO₂RE treatments will I need?

Generally you will see the difference you want after only one treatment. In the days after the treatment your skin will gradually look softer, smoother and with less unwanted pigmentation. The fine lines, wrinkles, age spots and uneven texture will start to show improvement.

How long will the results last?

The durability of CO₂RE results approaches that of surgical procedures. However, there are a number of variables that will determine how long you can expect the results to last including: your health, age and how you care for your skin after treatment.

What can I expect after my procedure?

Immediately following the procedure you can expect a sensation similar to a sunburn, lasting several hours. You can expect peeling of dead skin from the treatment area. This is a natural exfoliation process that may last 7-10 days.
