INMODE

## INTRODUCING THE BEST VERSION OF YOU.

Discover InMode's new ultimate non-surgical, high-definition skin tightening and contouring technology designed to address your facial and body concerns with its multiple technologies. Utilising clinically proven bipolar radiofrequency energy, IgniteRF precisely targets different tissue depths to provide highly effective treatments.

This innovative platform delivers natural-looking results providing you with a seamless experience.

REFINED TECHNOLOGY.  
ENHANCED PRECISION.  
EXCEPTIONAL RESULTS.

## THE PORTFOLIO

### MORPHEUS8 *burst*

Morpheus8 Burst is the ultimate skin treatment trusted to deliver optimal results to contract skin and address irregularities in smaller body zones.

### MORPHEUS8 *burst deep*

Morpheus8 Burst Deep is an advanced solution for skin contraction in larger body areas. It's large surface tip provides the deepest levels of targeted energy available. Trust Morpheus8 Burst Deep for safe and highly efficacious results.

All RadioFrequency technologies are minimally invasive devices designed to deliver tissue contraction. Rest easy knowing that a single treatment provides natural-looking results without large scars or prolonged downtime.

#### QuantumRF 25, BodyTite Turbo & BodyTite

These procedures deliver skin contraction and contouring in larger body areas.

#### QuantumRF 10, FaceTite Turbo & FaceTite

Safely and effectively contract loose skin in small body areas.

#### AccuTite

The smallest contraction handpiece, designed for the precise treatment of smaller, delicate areas.

IgniteRF offers the best-in-class technologies to provide the exceptional results you expect. Take control of your face, body, and self-confidence.

Look as incredible as you feel.

## ONE PROCEDURE - SIGNIFICANT, LONG LASTING RESULTS

### What Areas Can Be Treated?

Any area on the face, neck and body with saggy skin can be treated. This includes the double chin, jawline, arms, stomach, abdomen, knees and inner/outer thighs which are some of the most common treatment areas.

### What Kind Of Post-Procedure Care is Required?

The procedure may be performed under local anaesthesia or light sedation. After the procedure, patients can go home and likely resume regular activities the next day. Wearing a compression garment may be required for best results, if the procedure is combined with liposuction.

### What Is The Downtime?

Depending on the treatment area, downtime can vary from 1 - 2 days up to 10 days.

### How Is This An Alternative To Surgery?

With no cutting beneath the skin, or large incisions, patients will benefit from reduced post-procedural swelling and discomfort. This is a less traumatic treatment approach with a natural looking result.

### How Quickly Will I See The Results?

Results can be seen immediately, with best results noticeable after 6 months, and continuing up to 12 months.

Please speak to your Doctor if IgniteRF is right for you.
