## FRACTIONAL RADIOFREQUENCY SKIN RESURFACING

A non-invasive treatment, delivering heat to target the deeper layer of the skin (dermal layer) whilst the outer layer of the skin remains relatively intact. It stimulates collagen production resulting in reduction of fine lines, mild to moderate wrinkles, acne and acne scarring.

We usually recommend 4-6 treatments, 4-6 weeks apart.

## CLINICAL SKIN MICRO-NEEDLING

The Dermapen™ is a revolutionary device that gently punctures the skin with tiny medical grade needles that are operated via a motorised head. This micro damage induces the collagen production and delivers impressive results in treating scarring from acne or surgery, reducing pore size and giving a rejuvenated and younger skin look. The treatment finishes with applying a nourishing, calming mask for intense hydration.

Usually we recommend 4-6 treatments, 4-6 weeks apart.

### DEEP POWER CLEANSE (45 MINS)

95

76

Cleansing and exfoliating, with a purifying mineral mask (a pore refining and clarifying antioxidant mask). After the skin has been detoxified, the facial is finished with eye serum and moisturiser.

### SKIN RESCUE MEDI-FACIAL (60 MINS)

125

100

Cleansing and exfoliating followed by steam (to enhance absorption of active ingredients). Whilst the steam is in use, experience the true health benefits of this facial and lower stress levels whilst enjoying a relaxing scalp massage, followed by mask application (depending on your skin type).

### NEW LEAF SIGNATURE FACIAL (75 MINS)

155

124

Cleansing and exfoliating followed by a superb resurfacing Enzyme Peel. Build the barrier and boost skin immunity with a Repair and Restore mask. Reduce stress levels whilst enjoying a relaxing arm massage and enjoy the benefits of the firming, brightening and hydrating bio-alginate mask. Finish with serums, eye cream and moisturiser.

## DERMAPLANING (60 MINS)

155

124

Dermaplaning treatment is great for restoring a youthful glow, as the dead skin cells that sit in the hair on our face can give us a dull, lacklustre complexion. Removing this hair 'peach fuzz', along with the dead skin, will leave you with a healthy glowing complexion. It is performed using a sterile scalpel blade that gently glides over the skin and gives full-face exfoliation.

## PEELS

Skin Peels are designed to remove the outermost surface of the skin. This cell layer is actually dead and accumulates on your skin, causing it to appear dull, dry and rough. This build up of dead skin can also result in clogged pores and unsightly blemishes. By removing the layer of dead skin, the products applied to the healthy skin are better able to absorb. Chemical peels will stimulate new epidermal growth & collagen production. We do recommend a course of at least 3 treatments, 2-4 weeks apart for optimal results

## PRP (PLATELET RICH PLASMA)

PRP, otherwise known as the 'Vampire Facial' uses the patient's own blood, which is then spun with a centrifuge to separate the platelets from the red and white blood cells. The platelets are rich in certain proteins, known as 'Growth Factors', which stimulate collagen production and skin repair.

This treatment is effective in treating wrinkles, dark circles under the eyes, hair loss and 'crepey' neck. Ongoing improvement continues over the next 12 months. Usually we recommend 3 treatments, 4-6 weeks apart.

For even better results, consider PRP with RF or Dermapen treatments.

One vial is used to treat one area of concern (e.g. eyes).
